Descartes Commerce Essentials™

Implement reliable inventory control using Bin Count from Descartes Commerce Essentials

Increase your inventory accuracy level without the paperwork with the new bin count feature for Descartes Commerce Essentials! Our OzLink Mobile Warehouse (OMW) solution for NetSuite now offers inventory managers the ability to run blind counts to any bin(s) in the warehouse. Simply add a new bin count job to your user or group queue and run it ad-hoc or on regular schedule. All bin count jobs are centrally managed via our new secure web administration portal, and job approvals for inventory adjustments automatically propagate to NetSuite by a simple click of a button. Inventory managers can also choose what adjustment accounts in NetSuite need to be used by the automation process to ensure proper accounting operations.

Solution Areas
Ecommerce and Fulfillment

About the Product
Descartes Commerce Essentials offers NetSuite users an integrated mobile solution for mid-size B2B and B2C customers. Descartes Commerce Essentials includes warehouse management, shipping, and multi carrier integration at discounted rates.

TOP BENEFITS

- Most cost effective solution for netSuite e-com

- Native mobile warehouse solution

- Seamless Netsuite extension to ShipRush solution

Optimize your ecommerce value stream with Descartes Commerce Essentials:

Over 750 NetSuite customers are using Descartes' integrated solutions for warehouse and transportation management, fleet routing, proof of delivery, Ecommerce shipping and denied party screening. This allows small to large NetSuite customers to reduce warehousing and transportation costs, streamline and digitize operations for faster and more agile customer service, and meet international regulatory requirements.

FEATURES

Full WMS features
Manage your receiving, put away, picking, and shipping processes on the go, throughout your warehouse.

Inventory control
Take control over your inventory and avoid overselling or excessive stock by increasing inventory transparency.

Preferred shipping
Take advantage of streamed rating and shipping options.

Advanced analytics
Visualize the performance of your core WMS processes such as receiving, putting away and picking while using the data for incentive plans and improvement actions.

Descartes network integration
Our solution integrates natively with numerous Descartes solutions, such as Descartes Visual Compliance and Descartes Denied 3rd Party Screening.

BENEFITS

Scales to business growth
As you expand, Descartes Commerce Essentials can support your order management, fulfillment, and shipping processes. Extend your shipping control with denied party screening and visual compliance.

Reduce errors
Descartes' integrated NetSuite solutions allows for more visibility throughout the fulfillment process, resulting in a faster resolution and a positive customer experience.

Minimize labor costs
Descartes' Commerce Essentials provides directed order picking with a guided walking route, resulting in a higher pick rate. Reduce freight costs with ShipRush by selecting the best rates available in real-time.
